

Speechi!

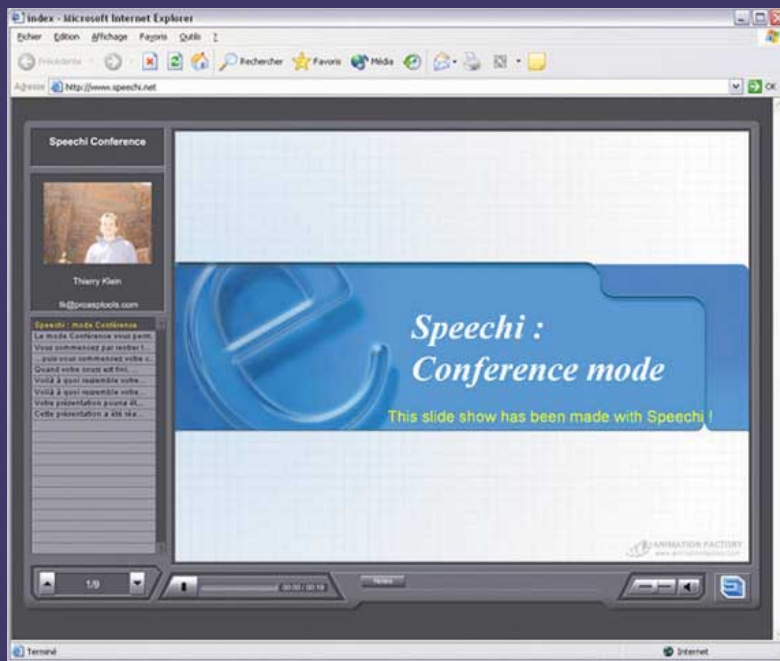

Publish your PowerPoint presentations on the Web, with sound!

Take your first step into the world of e-learning

“Powerpoint’s digital VCR”

- **Record** your classes, conferences, presentations...
- **Right** from Powerpoint...
- **And put** them online in Flash.
- **Easy to use**, no technical knowledge required!

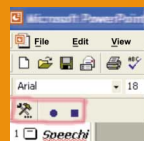

- Speechi works from Powerpoint
  - live, in front of an audience (Conference mode),
  - for pre-recorded presentations (Studio mode).
- The output is a Flash presentation with crisp-clear MP3 sound.
- Speechi presentations can be viewed from a PC, Mac or Linux by all your students.
- All you need is a PC and a microphone<sup>(1)</sup>!

How does it work?

Speechi just adds a VCR toolbar inside PowerPoint!

What for?

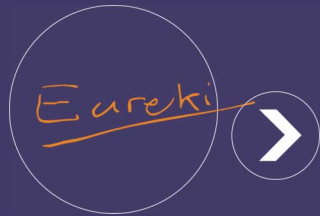

Speechi records your lessons, conferences, presentations and more.

What's the result?

Speechi transforms your Powerpoint presentations into animated Flash (streamed over the Web).

(1) Windows 2000 or XP, Pentium II 400 Mhz + processor.

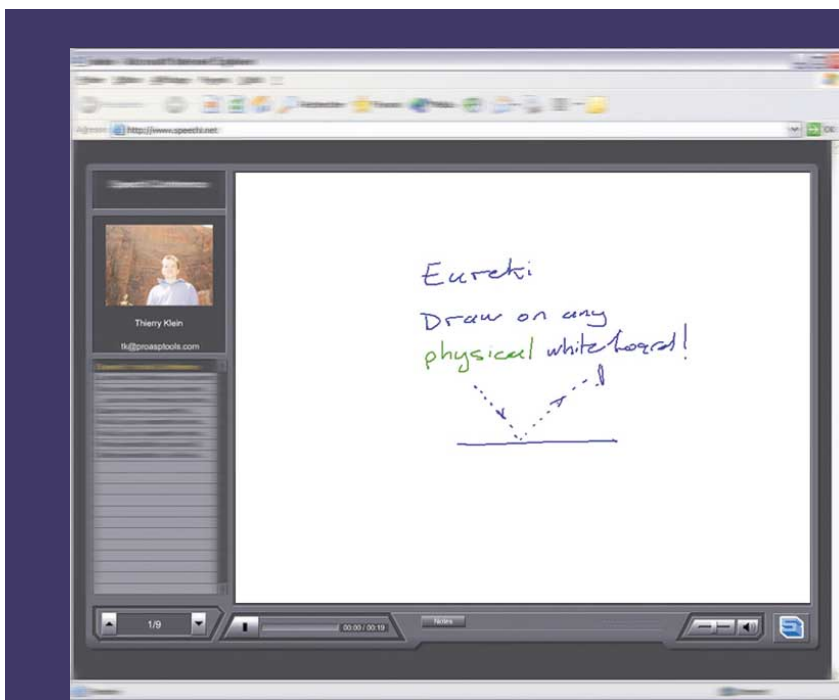

My whiteboard is on the Web!

Take your first step into the world of e-learning

"The online whiteboard"

- **Record** everything written on your whiteboard.
- **Put your** whiteboard online in Flash, and with sound!
- **No technical** knowledge required.
- **Eureki** works with all whiteboards, flipcharts and markers<sup>(2)</sup>.
- **Also** available in Bluetooth 1.1 wireless version.

Eureki is seamlessly integrated into PowerPoint

- your whiteboard diagrams get automatically inserted as PowerPoint animated slides,
- your classes are available online featuring your PowerPoint slides and whiteboard diagrams, synchronized with your speech.
